

Section 1
Module Description - General

Module Code	PRJ63604
Module Name	Capstone Project II
Year Level (Module)	3
Credit Value	4
Semester(s) Offered	February April September
Module Leader	Sumathi Balakrishnan (Sumathi.Balakrishnan@taylors.edu.my)

Synopsis
In this module, learners shall develop a technical solution to address specific needs as outlined in the project proposal which has been finalised during Capstone Project 1. The learning and teaching approach for the module will involve weekly briefings on salient topics coupled with consultative sessions with project groups involving an academic supervisor through face-to-face, online, independent and self-directed learning. The module shall involve students periodic presentations to academic supervisors to ensure that project objectives and agreed milestones are met. Regular reviews, feedback and critique sessions with academic supervisor and/or industry client during the project shall lead towards the implementation of the final prototype. The major task involves software development, testing and report writing in line with the project objectives leading to a viable computing solution.

General Pre-Requisite	-
Module Pre-requisite	-
General Co-requisite	-
Module Co-requisite	-
General Anti-requisite	-
Module Anti-requisite	-

Module Owner	School of Computer Science
Domain Name (for free electives only)	Science, Technology and Society
Module Offered as	Primary Major - Core

No./ID	Description	Bloom's Taxonomy	MLO %
MLO1	Think critically and apply appropriate methods, tools to implement solution through the development of the software solution in accordance to the project objectives	C3	50
MLO2	Implement professional and ethical practices through the developed solution.	A3	10
MLO3	Demonstrate effective communication skills to discuss key outcomes as per project objectives.	C3	20
MLO4	Critically appraise and discuss key outcomes of the software solution in the context of software engineering as per the project objectives.	C6	20
		100	

Section 3
Module Description - Align MLO to PLO & TGC Sub-Attribute

\

No	Module Learning Outcomes (MLO)	MLO %	Bloom's Taxonomy (MLO)	TGC Attributes	TGC Sub-Attributes	Description of sub-attributes	MQF LO	MQF LO Description
1	MLO1	50	C3	TGC 2a Problem Solving Skills	2a.2	Propose solutions to existing and emerging problems		
2	MLO2	10	A3	TGC 8 Global Perspective	8.5	Demonstrate a knowledge and respect of ethics and ethical standards.		
3	MLO3	20	C3	TGC 3 Communication Skills	3.2	Demonstrate disciplinary convention and display organisation	3c	COMMUNICATION SKILLS
					3.4	Use supporting evidence	3c	COMMUNICATION SKILLS
4	MLO4	20	C6	TGC 7 Entrepreneurialism	7.3	Manage resource and potential risks		

Section 4
Module Description - Transferrable Skills

Transferable Skills

TGC	TGC Attribute	Description of TGC Attributes	Sub-Attribute	Description of sub-attributes	MQF LO	MQF LO Description
TGC 2a	Problem Solving Skills	Problem Solving Skills refer to the ability to deal with problems/tasks/situations, formulate a plan to resolve a problem, implement a solution and monitor the process. In addition students need to be able to reflect on and evaluate the process and outcome to answer an open-ended question or achieve a desired goal.	2a.2	Propose solutions to existing and emerging problems		
TGC 8	Global Perspective	Global perspective refers to a person's ability to demonstrate awareness of their own culture, cultural diversities, social responsibilities, global contexts and ethical values.	8.5	Demonstrate a knowledge and respect of ethics and ethical standards.		
TGC 3	Communication Skills	Communication Skills refer to the ability to create and deliver messages effectively, expressively and sensitively in appropriate contexts and specific to the discipline.	3.2	Demonstrate disciplinary convention and display organisation	3c	COMMUNICATION SKILLS
			3.4	Use supporting evidence	3c	COMMUNICATION SKILLS
TGC 7	Entrepreneurialism	Entrepreneurialism refers to the ability to influence change by being proactive, resourceful and prudent in assuming risk.	7.3	Manage resource and potential risks		

Description of Assessment Components

The assessment for this module is external (Taylor's College)	NO
Resit Opportunity	None

Assessment Tasks

Assessment Task	Weight	MLO Assessed	Bloom's Taxonomy	TGC Assessed	MQF LO	Due Date	Maximum Mark (Task Level)	Maximum Mark (MLO Level)
